Abstract

Script and Language change with time, and all are moving around the script of the Indus Valley, only advanced civilizations know the fact. Lexicography symbolism is the oldest way to preserve the knowledge, where each word, sentence or Vedic hymn have symbol with vast ocean of knowledge in back ground and text in Veda. Each seal is complete in self to explore the principle of creation, and life.

The creation has evolved from a fundamental energy, and working with its dualistic force phonon, and photon. The four components of atom lay down the foundation of creation, and the four bases of DNA lay down the foundation of the Biological world.

The electromagnetic waves of light travel with vibration and sound together; just like dancers. The elementary particles adhered to space, the sound of vibration, touched, pressed the mark, and rebound. The colliding protons, decaying into hadron jets and electrons, converted them into electric vibrations to join them in series with phonic compression-electromagnetic force. The presser compression with touch and go changes the wavelength with the configuration of electrons moving around the nucleus with phonic atomic effect, and impart mass to elementary particles.

The photon and phonon are two complementary independent forces of vital energy. They interact at the molecular level with the configuration of electron and half-spin change in complementary wavelengths.

The photon and phonon have broad complementary spectra from gamma rays to radio waves with equal and opposite wavelengths. The immortal phonon stimulates the event with electron configuration and half-spin change in the opposite wavelength and the photon undergoes the synthesis and degradation with time $E=Mc^2$.

Keywords: Photon Phonon; Vital Energy Ashvins Dna

Indus Valley Breakthroughs

Deciphering the Indus Valley Vedic Sanskrit Lexicography on seals

Introduction

Indus Valley was the most advanced civilization. With the discovery of Higgs field 2012, DNA Watson and Crick 1953, Darwin 1859 origin of species, Phonon can disintegrate Photon in a crystal Lie et al 2014, the recent discovery of Gravitational interactions equal, and opposite Physics 2023 we have touched their height, and can grasp the symbols.

Though the IVC was the most expansive civilization of its time – spanning parts of present-day Afghanistan, Pakistan, and Northwest India, its archaeological sites are of great scholarly interest, we don't yet know which language(s) its people spoke. Their script is also yet to be deciphered.

Deciphering the Indus Vedic Language Code

Language, and script changes with time, they have used Lexicography, where each word, hymn or sentence has a symbol. The symbols have a vast ocean of knowledge in the background. Its answer is in complementary symbols in concern Vedic hymn. Sanskrit and Veda were in practice in IVC along with other languages. Symbols of Vedic hymns have been engraved on the seals to explore the origin and evolution of creation and life on the earth.

the seal symbols are complementary with Vedic symbolism for demonstration and teaching with text in the Veda. To decipher the Indus Valley symbols, and Veda has been a great puzzle for scholars. It is because the scholars were not acquainted with the Vedic scientific terminology and the height of Vedic science. UNESCO included Indus Valley and Rig-Veda in the world heritage list. It is unanimously accepted that the Vedas are the oldest literary monuments of human civilization on Earth.

Einstein's Unification Theory

There must be two equal, and opposite forces, independent of each other, Einstein said in his Nobel lecture in 1923.

The pre-cosmic dark atmosphere when nothing was there only deep darkness calm and quiet infinite inactive dark unborn energy. The shock wave appeared like darkness within the darkness as an unborn mirror image with equal and opposite characters. It is like the shock wave that appears before the earthquake. And with waves in existence, a sky appeared within the cosmos as a precursor of our solar system, the space is like the Higgs field ensign of existence.

Space has given a place for the vibration of waves, and phonon is the smallest unit of sound with resonance has plundered thoroughly the dark atmosphere and filled the waste with resonance it was touch and go reaction.

The scientists confirmed this in 2023. The Gravitational interactions are equal and opposite active and passive July 13, 2023, Physics 16 s 97 it has been searched at Indus Valley India long back, with the inquiry into the pre-cosmic atmosphere with

its text in Veda.

The photon and phonon have broad complementary spectra from gamma rays to radio waves with equal and opposite wavelengths. The immortal phonon stimulates the event with electron configuration and half-spin change in the opposite wavelength and the photon undergoes the synthesis and degradation with time $E=Mc^2$.

Big-Bang

The vibrational wave touched the press mark and rebounded and skewed the dark matter with electron transfer and half-spin change in the opposite wavelengths. The electron transfer generated tremendous heat Transverse waves in umbral fibrils in the chromosphere of a strongly magnetized sunspot. the energy flux carried by the vibrational waves was estimated to be $7.52 \times 10^6 \text{ W m}^{-2}$ Transverse oscillations and an energy source in a strongly magnetized sunspot Nat Astron 2023 has activated the dark matter with the opposite wavelength with electron configuration and half-spin change in the opposite direction. The phonon wavelength is immortal and infinite taking millions of years to activate the inactive magnetism-dark matter with opposite wavelengths with vital energy in action.

Ashvin's nucleotide pair Purine-Pyrimidine base

The mighty man's unborn fundamental energy dressed the spotted bullock in pre-cosmic condition. I saw from far away from the smoke of fuel with spires that rose on high beneath it. The Mighty men have dressed the spotted bullock. These were the customs in the days of foretime Rig.1-164-43.

The concentration and compression of vibrational waves, and dark matter with tremendous heat in the center, the vital energy in action with vibrational wave synthesized purine and pyrimidine base (Ashvin's nucleotide pair Tvashta DNA) Vessel of life with three immortal and three stages of life with blasts, and light radiant flames.

Radiant Flame

The radiant flame 'Jyotirlinga' is the first symbol of vital energy in action 'SWAYAM BHU' self-originated.

He drives the sun and planets like a car wheel.

Sa Suryah paryuru varansyendro va vratyadrathyeva chakra Rig.10-89-2 A

Surya is he; throughout the wide expenses shall Indra electricity turn him, swift as car wheel in cyclic manner.

He drives the sun and others like the wheel of the Rath car.

Mahakaleshwar Ujjain

The great Event Time 'Kal' 'MAHAKAL Ujjain is the center of calculation of Time with an ancient observatory. The 'Jyotirlinga' is placed from where the Cancer meridian line passes at 23.5 degrees latitude.

Twelve 'jyotirlinga'

The flow of the photon and phonon has been halted with the formation of the atom, and the underlying space Higgs field granted mass to the elementary particles with the formation of asteroids and planets.

The creation evolved from space, and Higgs Field underlying space imparted mass to the elementary particles with the asteroids and planets.

Golden Embryo Lord of All Created Being's Ensign of The Existence of all Hianyagarbha Sukta Rig.10-121-1

It has brought forward the sun in action as a source of light and energy with a strong magnetic field. The rotation of the sun at its axis has given the concept of time as a great event MAHAKAL' Jyotirlinga at Ujjain, as one-wheel chariot and the twelve 'Jyotirlinga' in India represents Twelve fellows Twelve 'Aditya' twelve faces of the sun with 360 days cycle of one 'Samvatsar Kal' under which the creation is working as a system under cycle of six seasons.

The Photon, Phonon, and Tvasta DNA (nucleotide pair purine and pyrimidine) shed with incandescent gaseous cloud-like bullet.

Three immortals.

Hear all the Gods my words, Sarasvati give ear together with Puramdhi and with holy thoughts (Rig-Veda 10-65-14)

Speak forth the three words, the words which light precedeth, which milk this udder that produces nectar.

Quickly made manifest, the Bull hath bellowed, engendering the germ of plants, the infant (Rig. 7-101-1)

The Sarasvati thought words ensign existence with the chemical energy of food, which generates thoughts in the mind and vital energy ensign of life manifest with action, the germ of plants and infants as well.

The three immortal; the resonant vibration of words precede light, they together produced the nectar, which milk this udder with cell body, the ensign of existence. With this, the fundamental energy Soma, manifested like Bull, and Bull bellowed engendering germ of plants, the infant also. The speed of the resonant waves is more than the light, which stimulates the action.

The bull bellowed engendering germ of plants, the infant. The fundamental energy appears with the streaming of protoplasm and disappears with aging and death, the energy present in the space of the nucleus in the atom is holistic Bell's theorem 1972. Life is the Trinity of Three Immortals, which appears with birth and disappears with death

- The Higgs field, the immortal underlying space of the sky imparted mass to elementary particles, a sign of the existence of all.
- The immortal chemical energy of photosynthesis feeds living beings with food metabolism and is the source of life.
- The immortal DNA with immortal resonant words is the light of life for all with the activation of DNA mental code in the womb of the mother. The vial energy appears with birth, and disappears with death.

This Puruṣa is all that yet hath been and that is to be:
The lord of immortality, which waxes greater still by food Rig-
Veda 10-90-2.

How the creation has evolved? It has been indicated in the Puruṣa sūkta, where the fundamental energy has been imagined metaphorically in the form of a Puruṣa, with innumerable heads, eyes, and feet, he pervades the earth and the world, and even above and fingers-finger wide space, it indicates that the fundamental energy-Puruṣa is present everywhere.

Laws of Thermodynamics

The Puruṣa Sūkta is the most important hymn of the whole Vedic literature, which symbolically reveals the secret of the creation in only sixteen-stanza. In the Puruṣa sūkta - fundamental energy has been described as the personal life-giving principle, as well as the source of the creation, from where the evolution of the creation has been traced, with the Laws of Thermodynamics (Rg.10-90-1 to 4),

A thousand heads hath Puruṣa, a thousand eyes, A thousand feet on every side pervading earth he fills a space ten-finger wide Rg. 10-90-1. The fundamental energy has been metaphorically imagined in the form of a Puruṣa The Puruṣa fundamental energy has been imagined symbolically with innumerable heads, eyes, and feet, who pervade the earth and even above it, he fills a space ten-finger wide, it means in the heart region. It indicates that fundamental energy is universally present everywhere.

This Puruṣa is all that yet hath been and that is to be.

The lord of immortality, which waxes greater still by food Rig.10-90-2

It has been indicated here that the fundamental energy is eternal but transformed, through which it increases, which is its food symbolically. The lord of immortality, it means it remains constant in all states and is imperishable.

So mighty is his greatness; yea greater than this is Puruṣa. All creatures are one-fourth of him, three-fourths eternal life in heaven Rg.10-90-3.

Here, it has been said that the cosmos is like a vast ocean of fundamental energy, the visible world is only one-fourth part of him and the rest three-fourth part of it is in heaven above the visible world.

With three-fourths Puruṣa went up: one-fourth of him again was here. Thence he strode out to every side over what eats not and

what eats Rig. 10-90-4.

Three Face, here, it has been said that the three-fourth part of the fundamental energy is invisible in heaven, only its one-fourth part undergoes transformation again and again. It spreads on every side as animate and inanimate creations.

Higgs Field God Particle

From him Virāj was born; again Puruṣa from Virāj was born. As soon as he was born he spread eastward and westward o'er the earth Rg.10-90.5

From space, Viraj was born from Viraj and again Purush was born, as soon as they were born spread on eastward and westward. It means underlying imparted mass to elementary particles spread on all sides with Asteroids and planets, Higgs field 2013.

From that great general sacrifice, the dripping fat was gathered up.

He formed the creatures of the air, and animals both wild and tame Rig.10-90-8.

From it were horses born, from it all cattle with two rows of teeth

From it was generated kine, from it, the goats and unborn Avi were born rIg.10-90-10.

The components of the creation plants with the Avy Chlorophyll, and all forms of the creatures evolved from the same.

The decipherment of the Indus Valley explores that the Indus Valley was the most advanced civilization. The seals and tablets excavated at Indus Valley were prepared for demonstration and teaching, to teach the Origin and evolution of creation and life, with its text in Vedas. Biotechnology was their main business.

The most important discovery is that fundamental energy works with its dualistic force Photon and Phonon. The Phonon stimulates the event to happen and the photon undergoes

synthesis and degradation with time **Einstein's Equation** — **Higgs field God particle**

$E=Mc^2$ The Phonon wave beholds Life consciousness and the DNA purine, -pyrimidine base with the three immortal, and three stages of life vessel of life shed with cosmology.

Vital Energy Working with its Dualistic Force

Chief is also the meanest (Kaniṣṭha) of them; the one God, who has entered into the mind, born the first, and he within the womb Ath. 10-8-28 The fundamental energy works with its dualistic force Phonon and Photon. They together have been termed as both the father and their son metaphorically. of them; the one God, who has entered into the mind, born the first, and he within the womb. Out of these two, one Phonon entered in the mind first and stimulated the language of DNA in the womb, the phonon is earliest, it has activated the Dark matter in pre-cosmic conditions with equal and opposite wavelength.

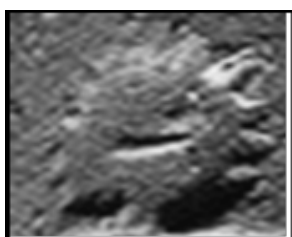

The vital energy is working with its dualistic force, connected at the molecular level with equal, and opposite wavelength. The building block of the creation is four components of the atom, the four bases of DNA constitute the building block of the Biological world.

Bhaga fashioned the four feet; Bhaga fashioned the four frame pieces (? Usyala; Tvasta adorned (pic) the straps (? vardhna) along in the middle; let her be to us of excellent omen Atharvaveda 14-1-

The dualistic force of Fundamental Energy

Gods' tongue is true nectar 'Amrita's center, space in the nucleus The space in the nucleus of an atom imparts mass to elementary particles in series. The underlying space imparted mass to elementary particles with asteroids and planets.

The building block of the creation is four components of an atom and the building block of the living-beings is the four bases of DNA

The four-horned Buffalo emitted Rg.4-58.

The four components of the atom, three elementary particles, and energy feed the creation like Buffalo milk. It is the essence of the creation like clarified butter.

Four Horns

Structure and function of DNA, four bases of DNA constitute the building block of living beings.

Four are his horns, three are the feet that bear him; his heads are two, and his hands are seven in number. Bound with a triple bond the Steer roars loudly: the mighty God hath entered into mortal's Rg.4-58-3

The four horns – The four horns are a symbolic expression for four bases of DNA, they are universally present in the living-beings, three legs – the DNA execute its function with triplet genetic code, the triplet genetic code is just like its three legs for its function.

Two heads - The two helices of DNA are just like his two heads. Seven hands - The triplet nucleotide pairs have two hydrogen double bonds and a hydrogen triple bond. = it is just like the seven hands for actions.

Triple bond – DNA replication and synthesis depend on the hydrogen triple bond, it has been explained by saying that 'bounds with the triple bond the DNA roars just like a steer.

DNA is universally present in living beings, they are subject to birth and death, hence it has been expressed that the mighty God-DNA has entered into mortals.

Tvashta DNA the Lord hath made all forms and all the cattle of the field:

Cause them to multiply for us rIg.1-188-9 Ribhu-Cell and Dna-Tvashta Life has evolved with the genetic recombination, and cell division. The Vac word is the identity of life along with the complimentary genetic identity of an individual.

Creation Sacrifice

All the components of the creation have evolved from fundamental energy and merged into the same with time. The components of the creation are linked with him like his ornaments. The building block of creation is the atom, and the building block of living beings is the four bases of DNA.

The Creation has evolved from fundamental energy, under the laws of thermodynamics. Einstein's equation $E=Mc^2$.

The fundamental energy has been described as omnipotent, omnipresent, and omniscient God in religious scriptures. The fundamental energy in the space of the nucleus drives the life consciousness on the path of evolution. It has been described as a Soul. The DNA with the charger is bio-soul.

Creation like spider's web

Spider's Web

The structure and function of the creation have been indicated symbolically. It has been expressed that 101 elements in nature are just like 101 ministers, they have stretched the creation, just like a spider's web in nature. It is due to the cyclic chain reactions in nature. Accordingly, the food chains and food webs in nature have been expressed symbolically. the sacrifice was drawn out with threads on every side, stretched by a hundred sacred ministers and one,

This do these Fathers weave who hitherward and cry, Weave forth, weave back Rg. 10-130-1 It has been expressed that the creation sacrifice is just like a spider's web, it has threads on every side stretched by the hundred sacred ministers and one. The food chains and food webs in the creation system have been

expressed Rg.10-130. The Man extends it and Man unbinds it: even to this vault of heaven hath he out spun it. These pegs are fastened to the seat of worship: they made the Sama-hymns their weaving shuttles. Rg. 10-130-1.

It has been expressed that the Puruṣa- unborn fundamental energy is in the picture for the synthesis and disintegration in nature. The Bio-Geo-chemical cycles in nature have been expressed/ Sama, the vibrational wave, immortal phonon act as weaving shuttle with synthesis and degradation with time in a cyclic manner.

The Man binds it and Man unbinds it

The electromagnetic bond energy with synthesis and degradation in cyclic manner regulate the creation with oxidation and reduction in series, Oxidation and Reduction have been described metaphorically as the two mothers of the creation, where one is related to the synthesis and the other is related to the disintegration, they move one after the other without end. They maintain the balance in the system.

A certain pair of maidens, of diverse form, weaves, betaking themselves to it, the six-pegged web; the one draws forth the threads taunt, the other sets [them]; they wrest not off they go not to an end Atharvaveda, 10-7-42

These sons of yours Rbhus) are well skilled in the work of wondrous power brought forth to life the two great mothers first of all. To keep the truth of all that stands and all that moves, ye guard the station of your sons who know guile RIG. 1-CLIX-3.

The foremost event in the creation is vital energy as oxidizing reducing agent with electron transfer.

Two birds under the same sheltering tree It has been expressed that the Puruṣa- unborn fundamental energy is in the picture for the synthesis and disintegration in nature. The Bio-Geo-chemical cycles in nature have been expressed through the pegs and the Soma synthesized materials, they are acting just like the weaving shuttles.

The Man extends it and Man unbinds it: even to this vault of heaven

hath he out spun it. These pegs are fastened to the seat of worship: they made the Sama-hymns their weaving shuttles. Rig.10-130-1 Sama, the vibrational wave, immortal phonon act as shuttle with synthesis, and degradation in a cyclic manner.

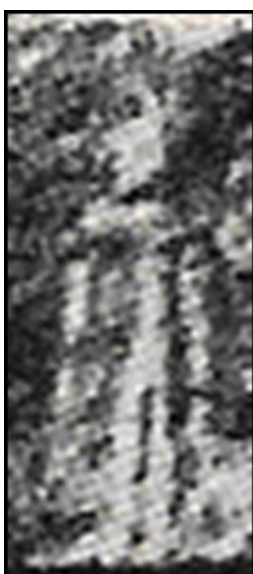

Life and spirit

The watchman of life as a spectator, and DNA bio-soul enjoy life under the fundamental energy like sheltering tree.

Two Birds with fair wings, knit with bonds of friendship, in the same sheltering tree have been found to be a refuge. One of the twain eats the sweet tree fruitage; the other eating not regardeth only Eig.1-164-20 In this stanza, Sayana, says that the two birds are the vital and the supreme spirit, dwelling in one body. The vital spirit enjoys the fruit or rewards of actions while the supreme spirit is merely a spectator.

The DNA (Deoxy Ribose Nucleic Acid) in the body is the Bio Soul, which enjoys the fruit of life, and the Soul's fundamental energy in the body is a spectator. And DNA Bio-soul enjoy the fruit of life

O Soma, Thou Standest

Activation of the Dark Matter (inherent inactive magnetism) in the pre-cosmic condition, and the vital Fundamental energy in action standup like standing Man

Life-supporting system

Guarded by covering arrangements, defended by watchmen (bārhatā), O Soma, thou standest hearing the pressing stones; no earthly one partakes of the Atharvaveda 14-1-5.

The Purus fundamental energy in action has extended the creation like a spider's web with energy transformation.

Magnetic Field, And Magnetosphere Around Earth

Atharvaveda One of them clothes himself in this earth; one encompassed the atmosphere; Atharvaveda X-8-36.

The one who clothes himself in this earth is earth's geo-magnetic field, and the one who encompasses the atmosphere is the earth's magnetosphere, which protects the Earth from the magnetic field of the sun and other planets Atharvaveda 10-8-36

Ashvin-DNA is a vessel of life, Life is like a bird's nest upon the tree Rig. 10-127-4.

Life has evolved from single DNA as vessel of life, with genetic recombination and cell division,

The wheels life is protected by the ozone layer third wheel

The Ashvin DNA shed with cosmology with the three wheels of the solar rays from the sun to earth has been expressed by the three wheels 1. Ultraviolet and x-rays, 2 Visible light, 3 Infrared rays.

The two wheels of thee, O Surya, the priests (brahma×) know seasonably; further, the one wheel that is in secret – that, verily, the enlightened (addhati) know.¹

The two-wheel– visible light & infrared rays are visible on the earth the third wheel of UV rays is hidden due to the absorption of the toxic UV rays by the ozone layer in the atmosphere, which protects life.

The visible light and infrared rays have been expressed by the two wheels symbolically.

With your three-wheeled chariot, to Sūryā's bridal There was one wheel of yours” Atharvaveda XIV-1-14, 16.

Now, ye people, take knowledge, he will speak a great mystery (? BrĒhamaḥ); that is not on the earth, nor in the sky, whereby the plants breathe Ath. 1-32-1.

It has been said that he will speak a great mystery about the plant breathing-respiration. That is not on the earth, nor in the sky, whereby the plants breathe.

In the atmosphere is the station of them, as of those sitting wearied; the station of this that exists (bhĒta): that the pious know or they do not Ath. 1-32-2.

The ozone layer in the atmosphere absorbs the toxic ultraviolet rays, and gave the way for origin of life with the entry of the visible light has been expressed.

Conclusion

Gravitational interactions prior to Big-Bang

The vibrational waves make noise phonons. The smallest unit of sound is the fifth force of nature, the most powerful force of nature, it stimulates the event with electron transfer, and half spin changes in the opposite wavelength.

Findings of Fermi-lab near Chicago made scientists to think that a fifth force exists in the Universe, other than Gravity, Electromagnetism, the strong force, and the weak force Gravitational interactions are equal and opposite, active and passive, Physics July 13, 2023.

Dualistic Force of Vital Energy

The fundamental energy is working with its dualistic for ce Phonon and Photon, it has been termed both the father and their son metaphorically. The phonon is immortal.

उतैषां पतिता वां पुत्र एषामुतैषां ज्ये उत वां कनऱि एको ह देवो मनंसऱिप्रवषिटःप्रथमो जातःस उ गर्भेऽ अन्तः॥

Both their father is also their son; both the chief is also the meanest (Kaniha) of them; the one God, who has entered into the mind, born the first, and he within the womb Ath. 10-8-28

The fundamental energy is working with its dualistic force Phonon and Photon. They together have been termed as both the father and their son metaphorically. of them; the one God, who has entered into the mind, born the first, and he within the womb. Out of these two, one Phonon has entered in the mind first and stimulated the language of DNA in the womb, the phonon is earliest, it has activated the Dark matter in pre=cosmic conditions.

परवापरं चरतो माययैतौ शशू क्रोडन्तौ परयातोऽर्णवम्।
वशिवान्यो भुवना वचिषट ऋतूरन्यो वदिधज्जायसे नवः
॥२३॥

By their power these Twain in close succession move; They go as playing children around the sacrifice. The electromagnetic rays travel with vibrations and sound in close succession with actions and interactions.

One of the pair beholdeth all existing things; the other ordereth seasons and is born again” Rg.10- LXXXV-18One holds all existing things is phonon, which is immortal, and other photon undergoes synthesis and degradation with time and is born again.

1

The immortal phonon follows The Ashvins nucleotide pair from generation to generation with new life.

The sapient with their spirit and their mind behold the bird adorned with all an Asura's magic might.

The voice is the identity of life; the DNA mental code grasps it first in the womb and pronounced it with the birth of an infant to cherish the life. The auspicious rein wave binds the life consciousness between life and death as two bow ends between birth and death.

Here, verily. I bind you, fast as the two bow-ends with the string. Press down these men, O lord of speech that they may humbly speak to me. 10-166-3.

Acknowledgement

I am very much thankful to Archaeological survey of India for seals, and tablets, and to Govt. of India for giving opportunity to work. As also to Journal of Physics and Chemistry for publishing the Indus Valley breakthrough.
